Eduardo **Sevilla**

CHEMICAL ENGINEER

León, Guanajuato, México

(+52) 4772330230 | edsevand@gmail.com | edsevand.github.io | edsevand

"Passionate about continuous learning and innovation"

Education

Universidad de Guanajuato   *Guanajuato, México*
B.S. IN CHEMICAL ENGINEERING   *Aug. 2017 - Jun. 2022*

Skills

Programming languages:	Python
Databases:	MySQL
Technologies / Tools:	Excel, Power BI, SAP
Language:	Advance English
Soft skills:	Meticulous attention to detail, Identifying and resolving issues, Adaptation, Teamwork

Experience

Towa Software   *Remote Job*
DATA ANALYST   *Aug. 2022 - Present*

- Utilized sophisticated analytical software such as Python and SQL to navigate through extensive datasets, revealing essential patterns and trends pivotal for making informed decisions.
- Implemented automated data cleansing and transformation protocols to drive ongoing improvement in data analysis methodologies, enhancing the efficiency and accuracy of analyses.
- Presented comprehensive data-driven reports and strategic recommendations to executive stakeholders, empowering informed decision-making and propelling business performance.

Nestlé, Purina   *Guanajuato, México*
PRODUCTION ANALYST INTERN   *Aug. 2021 - Dec. 2021*

- Used of SAP software to support the daily activities of the Production Analyst role
- Weekly implementation and visualization of area evaluations such as 5's, process trends and standards

Projects

Data Analysis   *Python - SQL*

I use Python and SQL to generate code to help make decisions in various areas. Have a look at my page. There you can see different ways to implement analytical software for data analysis.
